

### ES+ The Quick Indoor Solution for Removing Paint, such as Paint Spills and Graffiti

This product information is only intended as a guide to the handling of the product. Therefore, the ES METHOD cannot provide any guarantee for the achieved results. The user of the product shall perform tests and be responsible for the outcome.

ES+ is the perfect solution for effective indoor paint removal and an excellent complement to ES1 for metal roofs. With its easy application and superior performance, ES+ is a product you can rely on. Additionally, it is environmentally friendly and can be used both outdoors and indoors.

ES+ is a thickened and highly efficient paint stripper specially designed to work on porous surfaces and certain hard surfaces. It is an all-weather paint remover that delivers impressive results, particularly on porous surfaces. With ES+, you can remove paint from materials such as concrete, brick, granite, marble, limestone, sandstone, and slate. It also works great on surfaces painted with inorganic paint. For hard surfaces, you can use ES+ on tiles, glazed brick, and some plastics.

#### Here's how to use ES+

1. Apply the product on the surface using a brush, a brush, or an airless sprayer.
2. Let ES+ sit for approximately 20 minutes to 4 hours, until the paint has dissolved.
3. Use a natural sponge or a wet cloth to easily remove the old paint.
4. Paint directly on the dry surface. If there are any remaining "shadows" after the first treatment, you can reapply ES+ to achieve a perfect result.

ES+ is used in a concentrated form, and the consumption varies from 0.2 liters per square meter depending on the need. Store the product frost-free in its original packaging to ensure its quality. With a shelf life of at least 24 months in unopened packaging, you can trust that ES+ is ready to use when you need it.

We prioritize your safety, so we recommend always wearing protective gloves, clothing, and eyewear when handling old paints. The Safety Data Sheet (SDS) on our website provides additional detailed information on technical specifications and safety measures.

ES+ is a thick yellowish liquid packaged in convenient 5 and 25-liter plastic containers. It has a density of 1.09 kg per liter and a faint solvent odor.

## ES METODEN

**"CAPSULE IN; LIFT UP; WASTE DISPOSAL; REMOVE ALL MOURNING REMAINS; PAINT DIRECTLY ON A CLEAN AND DRY SURFACE."**

+7 °C - + 35°C
